

'I need the flexibility to  
invest in IT without tying  
up my capital'

## Payment Plan

*A flexible payment plan for your IT investment*

## Get the most from your IT budget

The IT system is a crucial investment for any business, and one that often involves substantial capital outlay.

However, tying up resources in IT puts unnecessary pressure on cashflow; it's also an investment pattern that's unsuited to the nature of the asset.

The fact is that hardware and software are rapidly depreciating assets and to stay up to date, you need to be able to upgrade your system regularly.

What can help is a payment method that doesn't sap resources; one that lets you respond easily to technology changes so you keep your system up to date and can get the best use from your budget.

## TSG Payment Plan

TSG Payment Plan allows you to acquire the IT hardware, software, network and support services that you need now, but pay for them over time. Because the plan is flexible, you can make timely upgrades and additions, often without increasing your monthly repayment amount.

It's a way of paying that is tailored to your needs, enabling your business to keep pace with the ever-changing demands of the market, customers and competitors. With TSG Payment Plan your technology investment is no longer a capital cost because you pay as you use it, and start seeing the benefits immediately.

## How it works

With TSG Payment Plan you can acquire the infrastructure, software and services you need now and pay for them over the course of their useful life.

This reduces the need for significant capital outlay, and enables you to access the system you need now. Not only is this good for your budget, it also allows you to demonstrate a rapid return on investment.

At the end of the agreement you can either return the equipment, continue to use it for a minimal annual fee, or take advantage of the Systems Change Option to make substantial upgrades.

TSG Payment Plan can be tailored to suit your individual requirements, such as phased implementations. You tell us what you need and we will work out the most cost-effective option for your business.

TSG Payment Plan is about much more than payment by instalments. It is a comprehensive method for obtaining your entire IT infrastructure, and keeping it updated.

# 'I need to show a faster return on investment from my IT System'

## Key benefits of TSG Payment Plan

### Improve cashflow and demonstrate ROI

By paying for your IT system over time, the impact on your cashflow is minimal, allowing you to allocate resources into other projects. You can also demonstrate return on investment at a much earlier stage.

### Preserves existing funding lines

By using the TSG Payment Plan, you're free to use existing sources of capital and credit in other business areas.

### Simple, and comprehensive

All aspects of your TSG service, including hardware, software and training, can be included in one simple, regular payment. Documentation is kept straightforward, so there is little administration to worry about.

### Tax efficiency

Because leasing payments are tax deductible, the TSG Payment Plan is tax-efficient.

### Plan for the future

With the Systems Change Option, you can upgrade and add to your IT infrastructure, often without increasing your monthly payment amount. So you can plan for the future, without worrying about capital outlay.

## What our customers say about TSG

'Our operations have expanded in recent years and it's essential for us to have effective IT running in the business. TSG's Payment Plan has given us the ability to update IT systems in a structured, cost effective way, ensuring we're getting the best out of technology advances and our investment in IT.'

Paul Goldfinch, Commercial Director, Polar Krush

'We set very specific financial goals for our system, and we're well on our way to achieving them. We've taken advantage of a five year finance plan which allows us to upgrade our system during the course of its life without increasing monthly payments. Tyre-Line now has a clear plan for the implementation, expansion and maintenance of our entire computer system, and knows precisely how much it's going to cost.'

Edward Musson, Managing Director, Tyre-Line
