

Microsoft Office 2007 and Windows Vista from TSG

10 ways your business can accomplish more with the latest business software

■ Your data safety net

Easily schedule automatic back-ups of documents, files and even entire hard disks with Microsoft® Windows® backup and restore. Recover lost files more easily with new Windows Vista™ shadow copy and improved Microsoft Office Document Recovery.

■ Organise it your way

Enhancements to Windows Vista Explorer let you use file properties to intuitively sort, organise and view your files - including work created in Microsoft Office. Use the new Microsoft Outlook® 2007 To-Do Bar to see your daily tasks and appointments in an integrated view, so you can quickly check your priorities.

■ New ways to see and do your work

Innovative navigational tools in Windows Aero™** make it easier to get to recently used documents and programs. The new Microsoft Office Ribbon replaces menus and toolbars with task-related commands, tabs and visual galleries.

■ Centralised customer information

Consolidate all customer and sales-lead information - email, communication history, relevant documents, sales opportunities and more - in one place using Microsoft Office Outlook 2007 with Business Contact Manager.

■ Professional design made easy

Make your business stand out with new SmartArt™ graphics. Easily save Microsoft Office files to PDF or XPS.**

■ Protect your inbox, your data and your peace of mind

Improve junk-mail filters in Office Outlook 2007 and new anti-phishing technologies minimise junk mail and potentially harmful email messages. Windows Defender* provides built-in tools for detecting and removing spyware.

■ Stop searching. Find.

Instant Search in Windows Vista and Office Outlook 2007 helps you quickly find what you're looking for - documents, media, programs, email messages and more - on your PC, in your email and across your network.

■ Work virtually anywhere

Windows Meeting Space lets you easily share files directly from your PC to other Windows Vista PCs over one-time, wireless or peer-to-peer networks. Windows Vista Remote Desktop Connection allows you access to files on your office PC from another computer.

■ Small budget. Big marketing

The new Marketing Campaigns feature in Office Outlook 2007 with Business Contact Manager, combined with the new Microsoft Office Publisher email merge capability, enables you to manage marketing campaigns and deliver targeted marketing communications to your customer.

■ Stay in sync with your business

Easy synchronisation of information with Windows Mobile® devices gives you access to email, business contacts, customer information, documents and presentations while on the road
