

# TOP REASONS TO CHOOSE PEGASUS XRL

XRL is an intuitive addition to the capabilities of Microsoft Excel. It provides powerful and flexible access to the financial information held within both Pegasus Opera II and Sage Line 50. With its flexibility, ease of use and drill down capabilities, XRL delivers fast and accurate information, providing enhanced analytical power, assisting the decision-making process.

## Key features

- XRL integrates with both Pegasus Opera II and Sage Line 50 (Accountant, Accountant Plus and Financial Controller), versions 9, 10 and 11.
- XRL Wizard will help you import data into Excel by the areas you are interested in
- Secure user rights protect sensitive data and give access to relevant personnel
- XRL data can be extracted straight out of the finance system – eliminating input errors common in manual spreadsheet use
- Produce valuable and detailed analysis using XRL's powerful reporting tools
- Drill down into chosen fields in Excel quickly to interrogate any business transactions
- The easy to use Data Send facility in XRL allows you to take information which has been prepared in Excel and load it directly into the accounts system
- The XRL link is live, so you will always be working with up-to-date information
