Who is it for

This course is suitable for novice XRL users who are responsible for generating and analysing reports for your business.

- A basic understanding of MS Excel would be an advantage
- Delegates must be users of the Financial Ledgers of Pegasus Opera II.

What is it about

This structured and practical course will provide you with all the essentials to produce most of the reports you will require. Exploring the most commonly used features the course will give you complete confidence in creating simple effective XRL reports.

The core basis of the course is based around the Financial Ledgers.

Course Overview

- Core Functionality of XRL
- Writing Reports – Practical Examples
- Filters and Criteria – How to get the right information
- Creating a Profit and Loss – A Trainer’s Guide.
- Essential hints and tips

Course Materials

A comprehensive workbook to use as essential reference after the event

What do I get out of it

- Have confidence in your ability to produce accurate, quick reports
- Know your way around the system and see significant time saved
