

Dedicated Servers

A Dedicated Server from Zen Internet gives you the freedom to operate and manage your own server environment, backed by our award winning network, service and support.

Dedicated Servers customers can choose between Linux and Microsoft Windows Operating Systems to deliver online business applications and services, ranging from dedicated Web servers to e-commerce and Intranet services .

Our Dedicated Servers use industry leading hardware and re hosted in our purpose built data centre to provide the highest level of continuous performance available. We aim to provide the ideal platform for your business critical Web sites and applications while letting you stay fully in control.

Dedicated Server Features

Standard - Web Platform

If your business is dependent on the availability of your Web site, our Standard model is the ideal platform for you. Our Standard server enables you to host your Web site(s) on your own dedicated server platform; free from the constraints and service issues often associated with a shared platform.

Prices from £249 per month, 12 month minimum contract.

Professional - Database Platform

If your business requires a powerful database or e-mail server that promises reliability, availability and performance, our Professional model provides the ideal platform. With a fully customisable configuration we can design the solution around your specific requirements and upgrade it over time to meet your evolving business needs.

Prices from £349 per month, 12 month minimum contract.

Enterprise - Virtualisation Platform

The highly specified Enterprise platform provides enough computing power, memory and resilient storage to drive a high profile, high demand online business. Disk performance on the Enterprise platform is lightning fast with a dedicated disk set devoted to file storage and a separate disk area for the Operating System.

In addition there is extensive memory and an Intel® Quad Core processor to provide a server powerful enough to operate a range of online applications in a single environment. This server is ideal for Software as a Service (SaaS) and reseller businesses.

Prices from £449 per month, 12 month minimum contract.

Product Guide

We use only the best components including Intel® Xeon® processors and the latest SAS hard drives.

We use high performance enterprise-grade Dell PowerEdge™ 2950 Servers in every solution.

All our hosting technical team are MCSE, MCSA and MCT qualified engineers.

24/7

As a Dedicated Servers customer you will have direct access to our qualified engineers 24/7.

Key Features

- 24/7 Network and Hardware Support
- Service Level Agreement (SLA)
- Secure Hosting Environment
- High Performance Dell™ Hardware Platform
- Server Monitoring and Alerts
- Choice of Windows or Linux Operating System
- Flexible Bandwidth Tariffs
- Powerful Firewall Security Product Options

All our dedicated servers are located in our secure purpose built data centres.

Flexible Server Options

The Dedicated Server platforms [below] carry a wide range of upgrade options to create a truly bespoke hosting solution.

These upgrades include:

- Increase bandwidth allowance
- Add Firewall Security to your server
- Optional Online Data Backup

“ A big thank you to Zen Internet for making our transition to SDSL so easy and painless. In the experience of the whole Warren Evans team, we have never been so impressed with the service, helpfulness and commitment of the Zen team ”

Mr R Garside, Warren Evans
