

# TSG Case Study: Foundation of Light

## Working better together at the Foundation of Light with Office 365

The Foundation of Light is one of the largest football charities in the UK. It works with 40,000 people every year using the power of football to change the lives of children, young adults and their families.

### The Challenge

The Foundation's systems were very much in need of modernisation, with a key aim to make their outreach centres much more collaborative and better equipped for employees.

Having the right technology environment is crucial for the Foundation to cultivate partnerships in the community and also to improve communication between colleagues working across the region.

### The Solution

Moving to Office 365 has allowed the Foundation to take advantage of SharePoint for both intelligent document storage and tight management and control. Everyone now has easy access to key documents when previously, staff were on separate domains so email was the only way to share documents with colleagues in different locations.

Now there's 'one true version' of any document and colleagues know they're working on, or co-authoring, the latest version. Unnecessary email traffic has been vastly reduced.

*"SharePoint has saved us a massive amount of time and increased our levels of productivity."*

*"I was really pleased with the way TSG handled everything and helped our teams get to grips with the new system."*

James Burman, Head of Communications,
