

PowerApps and Flow Fundamentals (£2250 plus VAT)

OFFICE 365: PLAN D

Our PowerApps and Flow Fundamentals package is ideal for businesses who are current and capable users of Office 365, but who are looking to take their use of Office 365 to the next level to really leverage their investments.

PowerApps allows users to build custom apps without writing any code. You can connect your apps to data you already have, and build it for both web and mobile.

Flow is a workflow automation tool that allows you to automate time-consuming and manual processes, freeing you up to be more productive. With over 170 connectors, you can build Flows that interact with a huge number of popular applications and services.

Why not take our PowerApps and Flow Fundamentals course to find out how to get the most out of two of the most innovative applications in the Office 365 suite?

Day 1

Morning:

- Introduction to PowerApps and Flow – Structure, features and typical uses

- Understanding your business
